## **Abstract**

“Thinking big” means opening our horizons, reaching for new possibilities in our lives, being open to whatever waiting for us on the road ahead... The attitude has been chosen as my philosophy of living, drawing upon the individuals and mentors I have met, my experience, and present profession as an assistant research fellow at the institute of Economics, Academia Sinica. It is the wisdom that has helped me to broaden my perspectives and will strengthen and prepare myself for the next hurdle in life. Having Professor Huang’s invitation, I would like to share this saying and my personal experience with young students who have equipped all kinds of talents and are eager to have a wonderful ride of their lives.
